

Good afternoon,

I am reaching out with a request to advertise and spread the word about one of the York County Conservation District's programs; the Large Woody Debris (LWD) Program. Through this program, the Conservation District can provide riparian landowners/managers with **cost-share and technical assistance** regarding large woody debris removal and streambank stabilization. Previously, our district has outreached through word of mouth and on our webpage, Facebook account, and Instagram account. However, we are confident that through more targeted outreach to Northern York municipalities, we can increase the amount of worksites. This would ultimately provide environmental and recreational benefits to the Yellow Breeches, Conewago, Fishing Creek, Codorus, and Kreutz Creek watersheds landowners – the citizens of your municipalities. Attached is the LWD Brochure that you can print and disperse as you see fit. Also, our latest article published by the conservation district for LWD is attached. This is more of a newsletter/flyer format that our district urges to include in **your** municipalities newsletter. You may also cut and paste to shorten the article but we kindly ask that you credit the district and include our contact information.

If you do not have a newsletter but have a webpage, please link our District page and consider uploading the flyer to your webpage so residents can learn about our programs. Lastly, if your municipality has a Facebook/Instagram please connect with us! You can repost our content so your landowners can see all that is happening at the York County Conservation District.

If you would like a different format or additional information about the Large Woody Debris program, you can contact me at the office phone or aswartz@yorkccd.org
Thank you all for your dedication and stewardship of York County,
